Invites you to our

Graduate Information Night

Tuesday 9th October, 2012
B1 (Basement), 207 Bouverie Street, Parkville
Commencing at 6.00pm
Meet staff & discover graduate study options

The School of Population Health offers a unique and exciting range of postgraduate professional education and research training opportunities. The School brings together the collective strengths of nine Centres and Units. We are unique in Australia with a population health focus on urban and rural health, on indigenous and international health. The School of Population Health has expertise in traditional public health sciences as well as in social sciences, ethics and medical humanities, and in newer molecular and genetic epidemiologic disciplines. This breadth sets the School apart in public health training and provides our students with key advantages.
