# Practical Methods for Health Economic Evaluation

27 - 29 March 2019

A three-day advanced course in methods for health economic evaluation. The course covers study design principles, techniques for analysing costs and outcomes, introduction to decision models, Markov modelling and its applications. Each module is re-enforced by exercises in STATA and TreeAge Pro.

Participants should be familiar with basic statistics. It is designed for those engaged in undertaking cost-effectiveness analysis and resource allocation decision-making.

**Early Bird Rate: \$2200\***
