

# Melbourne School of Population and Global Health Centre for Health Policy Seminar

THE UNIVERSITY OF  
MELBOURNE

## Public Health Transforming Lung Cancer Care *Presentation and Panel Discussion*

For decades, lung cancer has been a disease diagnosed late and is associated with a poor prognosis, fear and stigma. Lung cancer care is undergoing a transformation, with earlier diagnosis, longer term survival and improved quality of life being a reality for many people. In this seminar, A/Prof Emily Stone will speak about this paradigm shift and how clinicians, researchers and public health professionals have worked together to mount a strong case for transformative care, including the introduction of a targeted national lung cancer screening program and targeted therapies. Seminar participants will have an opportunity to engage in discussion about the key approaches used to transform lung cancer care and share ideas about what comes next

**Friday June 16 2023**  
10:30am - 12pm (AEST)

**Seminar Room 515**  
Level 5, 207 Bouverie St  
Carlton

**ONLINE**
